## *"Plant 'Em Growing"*

Kroh Brothers Nurseries has pioneered in the introduction of Container-established Ornamentals to the Plains Region. In the growing and replanting of thousands of plants in the past few years, we have shown the many advantages that this method of handling Nursery plants affords. First of importance is the successful plantability of this material anytime at the customer's convenience throughout the year. Secondly, the mortality rate due to transplanting is almost nil, far below the average spring bare root planting results; third, the ease with which container material can be planted by even the inexperienced gardeners.

The purchase price of container established stock is a little higher than the price of dormant bare root material of comparable size. This additional cost, however, is soon overcome by the lack of transplanting shock and by being unnecessary to prune the material back at transplanting. The immediate effect of container established ornamental trees and shrubs planted in full leaf is unequaled by spring planting of the dormant material at least for the first growing season.

It is no longer necessary to wait for the dormant spring season for the landscaping of your new home or reactivating older plantings. Complete landscape plantings may now be installed anytime throughout the summer or fall. Container established material offers the customer an unprecedented opportunity of personally selecting plant varieties individually appreciated and desired in their plantings from plants growing in full leaf and possibly in bloom from hundreds of varieties and thousands of plants on display at our sales yard.

**OUR LOCATION:** One mile north on highway 287 from junction of highways U.S. 287 and U.S. 34 at Loveland, Colorado — Office and display yards one block west of highway.

### **GUARANTEE AND TERMS OF SALE**

**GUARANTEE** as published in our Annual spring catalog applies equally to stock established in containers.

**PRICES** are cash with purchase. **C.O.D.** orders must be accompanied by at least one-fourth cash, plus crating charges if to be Expressed; Money Orders and checks are recommended for remittance.

**SHIPPING CHARGES.** All container stock is quoted F.O.B. the Nursery. The materials in gallon containers, Low-Growing Evergreens and Upright Evergreens may be shipped by Express with express charges collect. Shade trees and taller Fruit trees can not be conveniently shipped and should be called for at the Nursery.

**PACKING CHARGES.** Packing charges to be 25c per plant on all items established in one-gallon containers, 50c per plant on three-gallon and five-gallon containers. Due to the possibility of mishandling in shipment, we recommend customers make arrangements to pick up container established material at the Nursery if possible.

**PLANTING SERVICE.** Charges for planting are estimated on the individual circumstances and are not included in the price as quoted in the catalog.

**DELIVERY SERVICE.** We will periodically be making deliveries to towns within a hundred miles of the Nursery and it may be possible to schedule delivery of your material in one of these chartered deliveries at a charge of 10% of purchase price with a minimum of \$2.00.

### **"WHERE OUR CUSTOMERS SEND THEIR FRIENDS"**

We have enjoyed and appreciated an increasing summer "Plant 'Em Growing" business the past few years by virtue of our customers recommendation to their friends. This listing is to acquaint you with the completeness of our offering which includes many varieties in addition to those listed in our Annual Spring Catalog.

You are invited to visit the Nursery anytime and enjoy the thousand of plants we have growing and possibly in bloom in our fields and container-established "Plant 'Em Growing" display yards.

## EASY AND SIMPLE PLANTING INSTRUCTIONS

By following the instructions illustrated below, even the most inexperienced gardner can accomplish a professional job of planting. With these simple planting requirements and reasonable growing conditions, successful continued growth without wilt or loss of bloom may be expected.

**FIBER CONTAINERS ARE EASILY REMOVED BY SPLITTING SIDES WITH POCKET KNIFE. METAL CONTAINERS ARE SPLIT DOWN TWO SIDES BEFORE LEAVING NURSERY.**

**METAL CONTAINERS ARE REMOVED BY LOOSENING SIDES & BENDING AWAY FROM ROOT BALL. REMOVE PLANT BY LIFTING BALL WITHOUT BREAKING UP SOIL.**

**1. DIG & TEST HOLE SIZE & DEPTH BEFORE REMOVING CONTAINER. BE SURE GRAFT ON ROSES IS LOCATED ABOUT 2" BELOW SURFACE**

**2. REMOVE CONTAINER CAREFULLY & SET PLANT IN HOLE.**

**3. FILL AROUND BALL WITH GOOD SOIL GENTLY & FIRMLY PACKED.**

**4. LEAVE SOME SPACE TO HOLD WATER & SOAK THOROUGHLY.**

**5. AFTER WATER SEEPS AWAY, FINISH FILLING WITH SOIL.**

**CAUTION: DO NOT BREAK OR CRUMBLE SOIL ROOT BALL!**
